Corroded Activation Code [hacked]

About This Game

Corroded is an online Arena Brawler where up to six players fight and push each other out of a shrinking arena.

Jump into a game of Corroded with up to six players and fight to push each other out of a shrinking arena. A game in Corroded has several short rounds. Upgrade your robot before and between the rounds to find the best way to achieve victory. Counter your enemies, adapt to your surroundings, become the champion of the arena.

Inspired by the Warlocks mod from Warcraft 3, Corroded is a futuristic take with some mix-ups focusing more on speed and a compact skill system, giving it an arcade-like feel. We also bring dynamic levels that change over the course of the game.

Title: Corroded
Genre: Action, Indie, Early Access
Developer:
Encircle Games
Publisher:
Encircle Games
Release Date: 26 Apr, 2017

 a09c17d780

Minimum:

I bought this game because it was highly recommended by everyone who owns it, but found out that there's no players there. Still I recommend to buy this game, you won't regret.. reminds me of battlerite with a more warlock twist, would reccomend it, espessally if you have friends to play it with. I like it. Its fun to play vs friends.. Crush your friends, see them driven before you!. It's a fun game, well worth getting. Intuitive controls, interesting upgrades and a nice graphics. Everyone buy on sale, revive this sheeeit.. Pros:

\u2022 Has the 'fun' factor. I have spent too many hours playing WC3 Warlocks and am a big fan of that game. I have also played other Warlocks inspired games, like Spellsworn and RUiN, and this game captures the 'fun' factor the best out of all of them. I feel like you can put many hours in this game, and every round will feel unique and exciting.

\u2022 Beautiful art and graphics. I love the arcade theme, and the abundance of arenas to choose from. The projectile particles look great too.

\u2022 100% individual skill based. I love that I don't have to rely on teammates to do their part. I can only blame myself if I lost :).

\u2022 Lots of spells and a good variety of different robots to play with.

Cons:

\u2022 Lack of players.

\u2022 Region-locked. I can understand it if the game has an enormous player base, but that's not the case here. I'm willing to compromise on the latency if that means I can get a game going when I want to play.

\u2022 Physics system is somewhat clunky. It looks like there's a noticeable delay between a projectile hitting you and the knockback occurring. Also, I put up a reflective barrier, and things that should have been reflected were just passing through the barrier.

Small suggestions for the devs:

\u2022 Too much downtime between rounds. There is currently a full minute between rounds, which is only spent by picking spells. I suggest allowing "practice" spell shooting and movement during this time (this is what Warlocks does).

\u2022 Hotkeys are different after each game. When you pick a spell, it just goes to the next slot in the ability bar. I suggest creating a menu that allows the player to bind all spells to certain hotkeys (per robot).

Conclusion:

It's an early access game, and with early access comes bugs and issues (no developer can escape this). If you have played WC3 Warlocks before, or have played some type of arena brawler and love those kinds of games, then I feel like at $12.99 you will be getting a good bang for your buck. Please keep in mind that at this point, it is difficult to get a game going because of the lack of players and the region locking (join the Discord server to help with this). I feel like there's a lot of potential here, and I am looking forward to destroying lots of robots and watching the community grow :).

Note: I will try to update this review as the game gets updated.. Extremley fun game, but there is not many people who have bought the game. READ THIS AND BUY THEY GAME, This game has so much potential!. Servers only available in US and EU.

Options greyed out\/off top of screen. Cannot select a region. Since I am in AU it automatically puts me in EU (furthest away possible).

Game only displays in obscure resolutions.

Not enough people online to start a single game. (Only needs 6 players)

I will change my review if things change.

I bought this game for my friend and I because I wanted to support Norwegian game devs. Upon entering the game I learnt that it was abandoned long ago and is currently unplayable. This game shouldn't even be available to purchase on Steam.. Nice game. Who wants to play, write me. I played the game that this is a derivative of, and it's a wonderful succesor to it. The biggest issue at this time is the lack of players. As people pick this up, it should resolve itself. I can't recommend this game enough.. Yup, Warcraft III's Warlock gameplay is here! A little more "hero" oriented, but still!

With simple graphics, I think even low end\/old PCs can play the game without a problem. But the game problem is his low community while in Early Access, which is sad for such a gameplay worth trying, at least. ^^. It's a decent competitive game. The playerbase is tiny but matches are often set up through the discord.. DO NOT BUY THIS! A multi-player game with NO PLAYERS online.. ever. The game is dead and it's been dead for some years. Oh and about Steam support, they are not going to refund you. I played only for 16 minutes and all I get is auto-reply mails from Steam.
Anyways, I hope no one else falls into this money trap.
Cheers
